

# “Warning: Unseen Visitors May Be Making Residents Of (City) Sick...Right Under Your Nose”

## Asthma/Cancer Rates Continue To Climb

Dear Friend,

The *American Lung Association* tells us that, since 1970, the asthma rate increased **59% and**, since 1979, the death rates from it, **68%**. The numbers suffering from allergy problems increase yearly from continuous exposure to allergens. Asthma and cancer rates in children under the age of four continue to climb. *Why?*

## Dust Mite Allergens

There can be as many as **42,000 microscopic dust mites in one cubic inch of dust found in your carpet**. Dust mites thrive in carpeting and upholstery. Their excrement is highly toxic to humans. Causes: Asthma, eczema symptoms, itchy eyes, and runny nose. *Never* permit carpeting to become excessively soiled before cleaning. *Never* attempt to clean carpet yourself.

Improper cleaning, will increase allergen contaminants.

## Hazardous Dust & Vapors

Dust is a composite of particulate, solid substances that are hazardous to health, such as cancer causing heavy metals (*arsenic, chromium, nickel, pesticides and lead*).

deodorizers, cleaning agents to name a few. Dust found in carpeting is not *just* dust but a health threatening substance that should be *frequently and carefully cleaned away by properly equipped and trained professionals.*

**My name is Mike Frey, the owner of Very Best Services. My knowledge in carpet cleaning will impress you. The extra effort and time I spend will exceed your expectations. And the education I provide on after care will be invaluable. Protect your family call me today.**

Mike is Prompt, Efficient, Courteous, Knowledgeable and most of all Trustworthy! *Sue Richards, Meriden.*

**P.S.** I offer additional services in Pressure Washing Decks, Window Cleaning, Boat Upholstery, Hull Cleaning and Water Damage Restoration
